Exp no: 10 | Internetworking with routers with in CISCO PACKET TRACER simulation.

28/9/26.

AIM:- a) Internetworking with routers in CISCO PACKET TRACKER Simulator.

In this network, a router and used computers are connected with routers using a copper straight-through cable. After forming the network.

Procedure:-

Step 1:- (Configuring router 1):-

1) Select the router and open CLI.
2) Press Enter to start configuring router 1.
3) Type enable to active the privileged mode.

Router 1 command line Interface:-

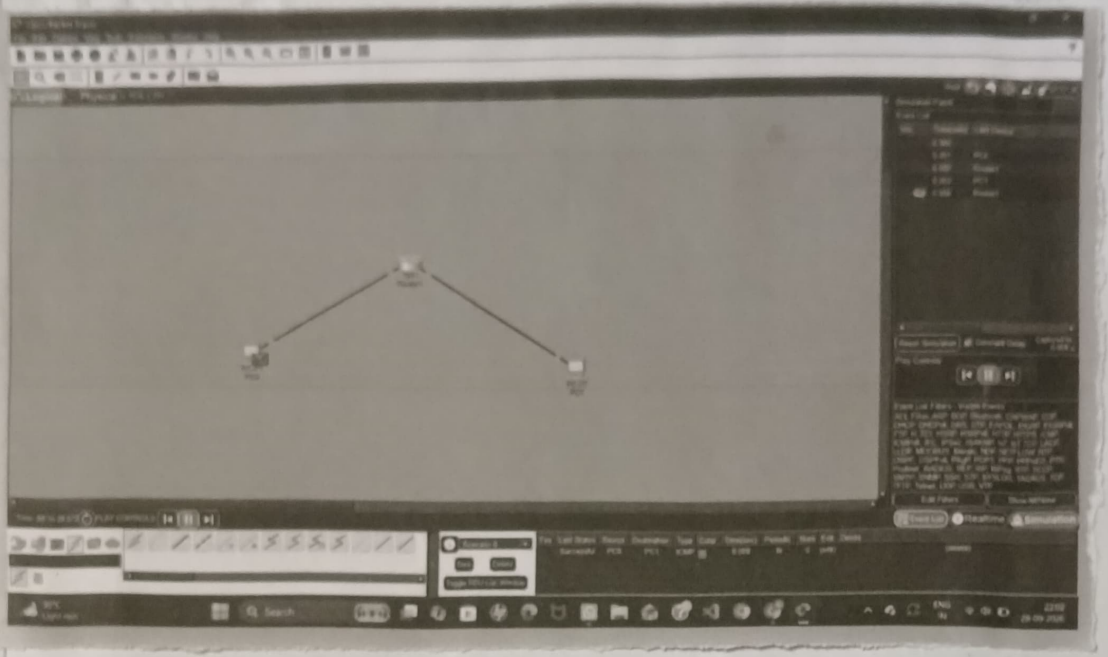

Router > enable.
router # Config t.
Enter configuration commands.
CNTL/z Router.
255.255.255.0 Router.

Step 2 (Configuring PCs):-

1) Assign IP Addresses to every PC in the network.
2) Select the PC, go to the desktop and select IP configuration.

Step 3 (connecting PC's with router) :-

* connect fast Ethernet () port of PC0 with fast ethernet 0/0 port of router using a copper straight through cable.

b) Design and configure an internetwork using wireless router, DHCP server and internet cloud.

Addressing Table

Device	Interface	IP address	Subnet mask	default
PC	Ethernet ()	DHCP		192.168.0.1
Wireless router	LAN	192.168.0.1	255.255.255.0	
Wireless router	Internet	DHCP		
cisco.com server	ethernet ()	208.67.220.220	255.255.255.0	
Laptop	Wireless ()	DHCP		

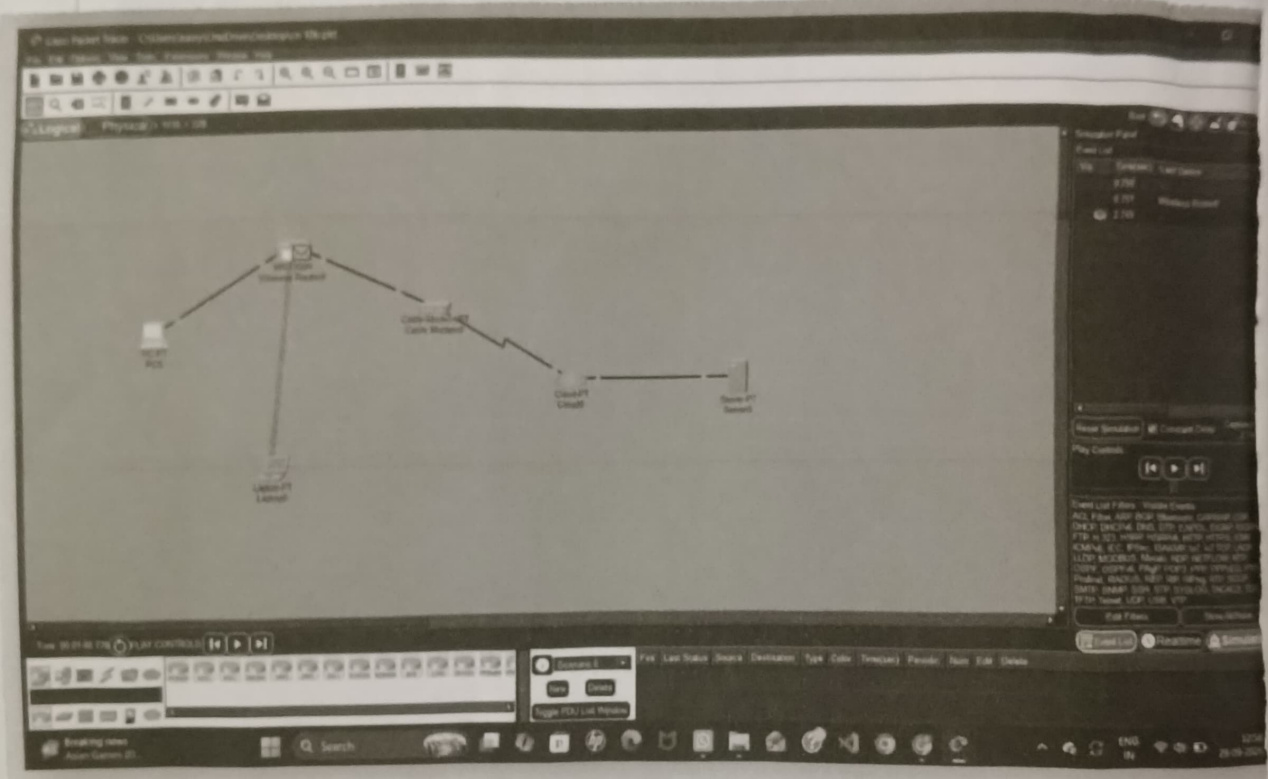

Objectives:-

Part 1: Build a simple network in the logical topology workspace.

Part 2: Configure the network devices.

Part 3: Test connectivity between network devices

Part 4: Save the file and close packet tracer.

Result:-

Thus the configure-inter network using switch, router and ethernet cables successfully executed.
